# JADRIAN ABRAMOVITCH

**Great Developer, Better Teammate**

## EXPERIENCE

### FullStack Software Developer

**Bonfire Interactive**

📅 September 2021 – Ongoing     📍 Kitchener, ON

- Integrated document drafting service into back-end using NodeJS, MYSQL, and ReactJS
- Investigated and leveraged tools to improve ReactJS front end code to be more performant and maintainable
- Aligned new front end components to be highly accesible (WCAG 2.0 compliant)
- Refactored MYSQL database structure and ORM queries to optimize performance
- Fixed bugs and improved User Experience using PHP and AngularJS.

### Software Developer Intern

**iS5 Communicaitons**

📅 January 2020 – September 2020     📍 Kitchener, ON

- Built REST-API back-end for a Customer Portal allowing customers to access software, trials, docs
- Used Spring Boot, Java, PostgreSQL, and Azure to restrict file access per government standards
- Invoked pipelines to ensure code quality, leveraging unit/integration tests and static code analysis

### QA Automation Engineer Intern

**Symantec**

📅 September 2018 – May 2019     📍 Waterloo, ON

- Automated hundreds of product tests, saving many hours of manual testing every product cycle
- Built additional functionality into testing library using Java and Perl to leverage Selenium
- Helped shift team to commmon industry standards such as JIRA an Agile principles

## PROJECTS

### Find Me A Team!

**Python - Django**

- Web-app to connect with other players who play the same online multiplayer game as you
- Built using Python, Django, Bootstrap CSS, PostgreSQL

### Open Source Contribution - Time Tracker

**PHP**

- Decreased user errors by adding a visual indicator to show when a day is incomplete
